OUR ORGANISATION

One organisation, connected capabilities

INJIVA brings together INJIVA Academy and INJIVA Digital Systems. INJIVA Academy focuses on learning and skills development; INJIVA Digital Systems focuses on applying technical expertise to organisational challenges.

Leadership

Ruvimbo Mumbire is the Founder & Chief Executive Officer of INJIVA, encompassing INJIVA Academy and INJIVA Digital Systems.

Developing people. Strengthening organisations.

“INJIVA was founded on a conviction: talent deserves a pathway, and ambition deserves the capability to become reality.”

Ruvimbo Mumbire
Founder & Chief Executive Officer, INJIVA

OUR CAPABILITIES

Software engineering

Websites, applications, integrations and scoped improvements to existing systems.

Data engineering & BI

Data models, pipelines, quality checks and reporting built around agreed business definitions.

AI & automation

Bounded use cases, evaluated experiments and workflow automation with appropriate human review.

Cloud & managed support

Deployment planning, documented operations and support responsibilities defined for the engagement.

Potential applications span mining, agriculture, education, retail and professional services. These describe possible use cases, not a claim of completed client projects or sector accreditation.

WORKING TOGETHER

Clarity before implementation.

Begin with discovery and a defined scope. Agree responsibilities, acceptance criteria and delivery milestones. Review progress, test the work and document the handover and support arrangements.

01 / Discover

Understand the user task, current systems and practical constraints.

02 / Define and deliver

Agree scope, acceptance criteria and review points, then implement and test.

03 / Handover and support

Document the solution and confirm ownership, maintenance and support arrangements.
